Optimization of SIP beta

Our SIP team is continuously working on the optimization of SIP (Social Investment Platform) beta. More functions have been realized during the past month.

- After binding the wallet address to SIP, the user is able to check the balance of IOB tokens.
- The user can get access to all the transaction records of IOB tokens.
- The contract address of the transaction details page can generate a QR code.
- The user can not only see the numbers of like and dislike of his post but also see who upvote and downvote.

Please log in SIP (<http://iob.community>) and let us know your comments.

PoET™ (Proof of Enquiries and Trades)

Designing the market transparency protocol to make all exchange orders available on DLT, which will expose unfilled orders and prevent market manipulations. PoET protocol is being developed by IOB Mesh Technology GmbH (IOB Cologne). IOB Cologne works closely with our third-party blockchain partners and IOB North American trading teams to implement the PoET protocol on our Smart Trading™ System.

Smart Trading™

Testing APIs of several major exchanges.

Business Development

1. Engagement of Institutional Investors

We are at the final stage of due diligence with a major institutional investor. Continuing investment negotiations with industry leaders regarding IOB and its portfolio companies.

2. Smart Trading™ - Tier 1 Market Maker Accounts with Exchanges

IOB has successfully opened the account at Huobi as Tier 1 market maker. IOB has tested the available API and is working with the trading department team on solutions to improve their trading platform.

3. Re-Engagement of Wall Street

In anticipation of institutions entering the blockchain space IOB is in the process of opening an IOB Wall Street office and cooperating with old Wall Street colleagues and friends;

4. We are Hiring!

We are hiring in our offices in the US, Germany, and China. Please visit <https://iob.vc/careers/> for more details. Referrals are welcome.

5. New team member in IOB Cologne

We have a new employee in our Cologne office. Ms. Elena Dolga is working as the executive assistant of IOB Cologne.

Portfolio Companies & Partnerships

IHT (i-House Token)

- IOB has completed the distribution of the second part of IHT tokens (amounting to 12,250,000 pcs) to IOB tokenholders-on-record. The first distribution was conducted in this March which was most likely the world's very first dividend distribution to crypto investors. So far, IOB has distributed 100% of the tokens received from IHT.
 - IHT takes part in New York City Real Estate Tech Week on Nov. 16th.
 - On Nov. 9th, IHT Chief Marketing Officer, Brian Hui, talked about the STO (Security Token Offering) concept in South Korea, where he shared his views and ideas with local South Korean asset representatives and guests who were intrigued by STO. IHT starts to bring the STO Concept to South Korea.
 - IHT makes significant progress in the South Korean market. Their South Korean community in a short time span of just three months has grown six times its original size. i-House.com's official has been continually searching for new social channels to propel brand value worldwide.
 - IHT has attracted the attention of many foreign media outlets after announced its transformative security token offering (STO) platform.
-

XMED chain (XMC)

- The upgrade and development of the Beta version management system of XMC was completed, and the new functions for the recruitment of patients were also successfully launched, providing a variety of options for users with different needs.
- XMC is developing the “double wallet” and upgrading it on the basis of the original. It mainly includes user Ethereum and XMCT wallet management, enabling users to conduct transactions conveniently and quickly on the XMC platform and improve user experience.
- Recently, XMC has reached a cooperation with a well-known hospital in Seoul, South Korea. HPV has attracted extensive attention around the world, and many users in need in China are faced with the difficult to find a vaccination. This cooperation has enabled the XMC to open a channel for vaccination overseas. Since the launch of the event, hundred of users have consulted XMED Chain for this services.
- XMC has also cooperated with well-known Japanese medical institutions to provide users with new options in the treatment of joint pain. Its precise diagnosis and diversified postoperative services provide a better medical experience for patients.

Moolya

- Mr. Anthony Moore joined Moolya as Chairman of board of advisors. Anthony is a merchant and investment banker and ex-MD of Goldman Sacs in Japan and UK.
- moolya.global, moolyacoins and incucoin will be shortly be a part of a global VC firm titled 333n, the details of which are being worked out. 333n shall be the Global VC firm aimed at startup incubation using blockchain.
- moolyacoins crowd sale is upcoming starting from Dec. 15th and ending on Jan. 15th 2019.
- moolya.global now has dual coins on its platform - moolyacoins a transaction utility token and incucoin - a security token for pure investments.
- moolyacoins and incucoin attended TokenMatch and I&P Partnership summits in NYC.
- moolyacoins and incucoin is partnering with some business entrepreneurs on a few disruptive ideas to tokenises them. Details will be announced shortly.
